

City of Twin Falls, Idaho

Comprising more than **800 acres** spread across **65 locations**, Twin Falls' city properties cover a wide range of micro-climates with stringent water restrictions.

Baseline's **BaseStation™** irrigation controllers with **BaseManager™** central management software make supervising these diverse and widely distributed properties a snap.

PRODUCT LIST

- BaseStation 3200™ Irrigation Controllers
- Cell Modems
- BaseManager™ Central Control
- biSensor™ Soil Moisture Sensors

At the end of the 2014 watering season, the Baseline products had been in use on Twin Falls' city properties for 8 seasons. As the 2015 season progresses, park managers are experiencing another season of successful watering with their Baseline products.

"We evaluated other technologies and companies and felt that Baseline had the most durable, robust, and professional system."

—Todd Anderson, Job Site Supervisor,
City of Twin Falls, Idaho

The City of Twin Falls estimates 50% water savings since converting to Baseline
