

**IMPORTANT!**

Expansion modules are for BaseStation 1000 controllers manufactured before January 1, 2018

# BL-1000MEXP-1011 Installation Guide

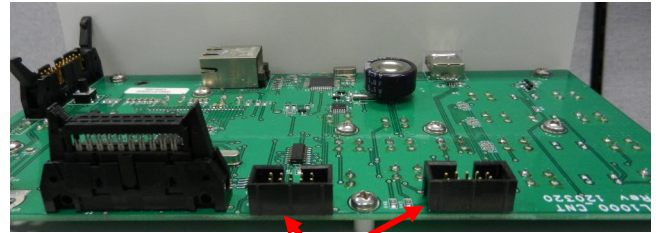

The BL-1000MEXP-1011 expansion module increases the total number of supported devices and provides full support for BaseManager on the BaseStation 1000 irrigation controller.

1. Disconnect power to the **BaseStation 1000**.
2. Identify the expansion slots on the back of the BaseStation 1000 display.
3. Carefully Insert the **BL-1000MEXP-1011 Expansion Module** into either expansion slot as shown.
4. Re-connect power to the **BaseStation 1000**.
5. Verify that the installation was successful by pressing the **System Setup** button on the controller. Select the **Expansion Modules** option, and review the information on the screen.
