

How to Update the Software on the BaseStation 3200/3000+

Project Description:

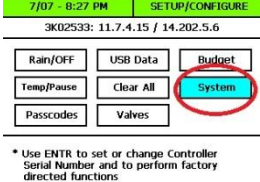

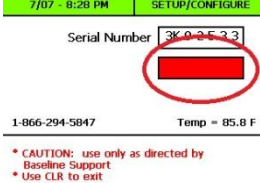

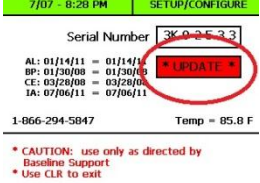

The following instructions explain how to properly update the software on the BL-3200/3000+ controller. Please follow the instructions step by step to ensure the software is installed properly. If you have any questions, you can always call Baseline’s customer support line at: 1-866-294-5847. Thank you for choosing Baseline!

What You Will Need:

The USB drive containing the software update files that you downloaded from the Baseline web site.

Instructions:

To update the software on the 3200/3000+ follow these instructions:

Step	Instructions	Pictures
1	Open the cabinet door to the BL-3200-3000+ to display the USB port.	
2	Plug the USB drive that has the update software file saved in the root level into the USB port. The port is located either on the front of the controller panel to the right of the dial or on the underside of the display swing panel below the buttons.	
3	Turn the dial to the AUX position. Press the PREV button once to select System , and then press ENTR.	
4	Press the NEXT button 5 times. The box below the BaseStation’s serial number will be highlighted RED .	
5	Press the - (minus) button twice. the word UPDATE displays in the red box. Press ENTR.	
6	The top left corner of the display panel will turn yellow for 2-5 seconds. If the controller does not automatically restart itself, proceed to step 9.	

Step	Instructions	Pictures
7	After the controller has finished restarting, turn the dial to the Auto Run position. Wait for the main screen to display, and then turn the dial to the AUX position.	
8	Verify that the software version listed at the top of the screen matches the version that you downloaded from the web site. If it does not, please skip to step 11. If it does, please skip to step 12.	 <p>* Use ENTR to set or change the number of Rain/OFF days (days to skip watering)</p>
9	To restart your controller turn the dial to the OFF position. Press and hold the + , - , and ENTR buttons at the same time for 5 seconds, and then release. Wait for the controller to restart.	
10	Please skip back to step 7!	
11	If the software version listed at the top of the screen in step 8 does not match the version that you downloaded from the web site, please call Baseline Support at 1.866.294.5847.	
12	Check your programming, and then turn the dial to the Auto Run position. Your software update is complete.
